

Are you looking to increase efficiency in achieving IDMP document and data management?

More than an eCTD viewer

Seamlessly ensure IDMP compliance with global regulatory experts & groundbreaking software.

Celegence uniquely combines operational and strategic expertise with our exclusive cloud-based dossier management solution, Dossplorer™, to streamline your IDMP management process, as an end-to-end service.

Create a flexible and forward looking IDMP data process using our advanced technology – Dossplorer to build and manage dossiers and eCTD data.

**Flexible and forward
looking IDMP data
and process
management
strategy.**

How can we support IDMP with Dossplorer?

Dossplorer is our leading, dossier management solution which allows you to share, view, review and analyze eCTD, NeeS and other dossiers formats from any region and access them from any location. Celegence's experience in regulatory operations and xEVMPD submissions enable companies to prepare for all iterations of IDMP, using Dossplorer as a 'plug and play' solution.

You quite simply tell us how many users you need, and upload your dossiers or, we have people who can do it for you.

Dossplorer Workflow for IDMP

Batch upload IDMP relevant registration dossiers in Dossplorer

- Automatically upload eCTDs and other dossier formats quickly
- Skip individual source document collection from eDMS
- Enrich imported dossiers in Dossplorer and enrich metadata using bulk import through Excel
- Import any file and folder structure

Full analytical capabilities using Dossplorer Power Search

- Identify IDMP data efficiently through full text search, and power search to find and replace data across all dossiers
- Power Search through all dossier text using an advanced analytics engine to allow for instant identification of relevant IDMP source data
- Automatic indexing of content for all IDMP relevant source documents
- Export search results automatically

Stay 'in sync' with IDMP relevant dossier update submissions

- Receive automatic notifications on IDMP relevant document update
- Quickly compare documents using the cross-dossier view
- Run a gap analysis across multiple files at once
- Automatically compare document contents for efficient impact assessment on IDMP Data

Instant translation of national text, e.g. for SmPCs and PIL

- Allow for centralised data entry of IDMP information without the need for English translation or translation by local affiliates
- Translate from any language to any language with 100+ languages supported

Moving forward Dossplorer will be kept up-to-date to view and process the DADI and IDMP FHIR messages along with the corresponding eCTD dossiers.

IDMP and SPOR data will be extracted from the FHIR messages to enrich the regulatory documents and applications in eCTD and boost the analytical capabilities of Dossplorer Power Search.

Sign-Up Today

Sign-up today and you will be up and running next month. There is no need to waste time going through your EDM system to collect files, just share copies of your eCTDs and we will upload them into Dossplorer, so you have a repository of fully text searchable IDMP files.
