

Smarter PMS Documentation with

Experience the power of CAPTIS, with its groundbreaking Document Creation & Maintenance Module.

This module enables you to save time and money by creating and maintaining compliant PMS documentation (CERs, SSCPs, PERs, PMCFs, PSURs etc) quickly and accurately, while ensuring consistency across all reports.

Data Dictionary

Information Consistency

- Modify entries across all documents with a single update.
- Align data and content across various documents for simplified maintenance using Local and Global Data Dictionaries.
- Predefine commonly used terms such as "Indication for Use" as dictionary entries to ensure consistency.

Content Linking & Traceability

Faster Reviews

Create a CAPTIS Link:

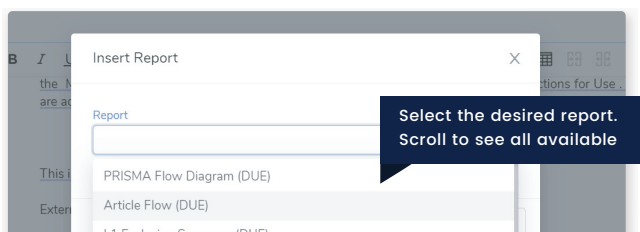

- Link to any content or information from a source document, such as an IFU.
- Maintain traceability and save time when verifying report content. Quickly navigate to the original source documents to breeze through content verification.

Inserting Automated Literature Reports

Reduced Errors

- Leverage automated, ready-to-use literature reports to present various elements from your literature review.
- Eliminate manual updates as all data is automatically updated from CAPTIS' literature review module.

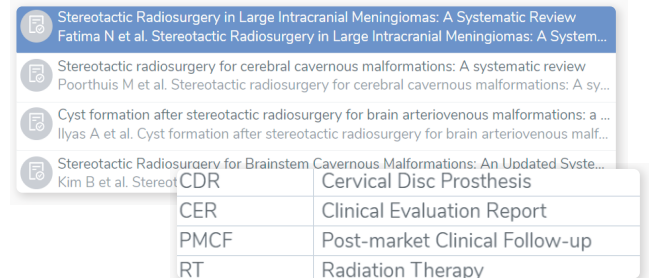

Automated Abbreviations & Citations

Saving Half The Time

- CAPTIS automatically creates a list of abbreviations, updating as new entries are added and used.
- The built-in Citation and Reference Manager automates the process of creating citations.
- Eliminates need for EndNote, Mendeley, and Zotero subscriptions.

Stay Aligned with Collaboration & Review

Team Alignment

- Work concurrently on various projects.
- Communicate with your team and update project status with comments and responses.
- Assign roles and responsibilities with customizable review workflows.
