GenAI PMS Documentation With

Experience the power of CAPTIS® AI, with its ground-breaking document creation & maintenance module.

This module enables you to save time and money by creating and maintaining compliant PMS documentation (CERs, SSCPs, PERs, MMCFs, PSURs, etc.) quickly and accurately, while ensuring consistency across reports.

Data dictionary

Information consistency

- Predefine core product information, such as "Indication for use", "Launch date" etc. as dictionary entries to ensure consistency.
- Modify entries across all documents with a single update.
- Automatically prepopulate data placeholders in templates upon document setup, saving time and ensuring consistency.

Content linking & traceability

Faster reviews

Create a CAPTIS® link:

- Link to any content or information from a source document, such as an IFU.
- Maintain traceability and save time when verifying report content. Quickly navigate to the original source documents to breeze through content verification.

Automated abbreviations & citations

Saving half the time

- Insert and auto-update your list of abbreviations with a single click as new terms are added.
- Easily insert references using the built-in Reference Manager.
- Access the full review context for each reference—decisions, notes, team discussions, extracted data, and AI-generated insights—all in one place.
- Download PDFs of all inserted references in one click for a ready-to-submit package.

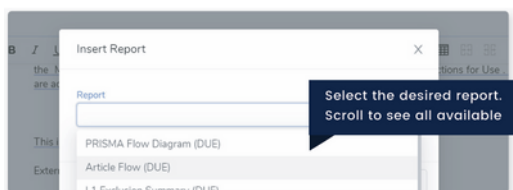

Inserting automated literature reports

Reduced errors

- Leverage automated, ready-to-use literature reports to present various elements from your literature review.
- Eliminate manual updates as all data is automatically updated from CAPTIS® literature review module.

Chat with your source documents

Get instant insights

- Upload technical documents, IFUs, and other source files, then ask questions directly in plain language.
- AI Chat reads the document and delivers instant summaries, answers, and insights—no need to scroll or search manually.
- Perfect for quickly understanding complex content, verifying details, or preparing submissions with confidence.
